Be sure to check the leg diameter when looking for replacements. Image, Nelson NS-20 and Erico Guns use 3/8 in. diameter legs. Nelson NS-30 and NS-40 use 5/16 in. diameter legs.

The ends of Image legs are brass to prevent weld spatter from building up on them. A new leg comes complete with the special washer and screw. The special washer and screws are available as a separate item.

NOTE: Legs are sold individually, so if you need a pair be sure and order two.
